## For Friction Relief

ShearBan<sup>®</sup> is a patented interface material used by healthcare professionals and footwear specialists, worldwide, to protect against skin tissue trauma.

ShearBan works by offloading friction and related shear forces at areas of concern on footwear and medical devices; complementing traditional pressure offloading techniques.

Low friction PTFE film allows human tissue to glide smoothly over at-risk areas of footwear and medical devices. Durable adhesive backing ensures immediate and long-lasting bond to fabric, leather, plastic, and other footwear materials.

### Apply ShearBan to:

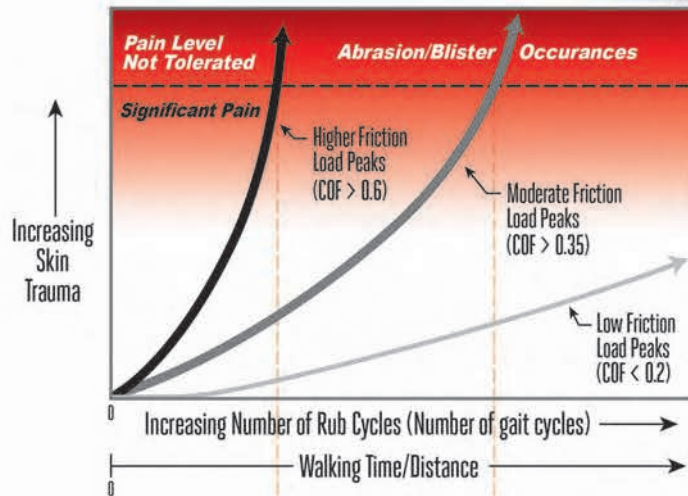

- Casual/Walking, Athletic, and Dress Footwear
- Orthopedic braces (AFO's, KAFO's, Spinal Braces)
- Insoles/Foot orthoses
- Prosthetic Sockets
- Sports equipment

### Indicated for individuals with

- Hot Spots
- Calluses
- Blisters
- Foot ulceration

### Apply ShearBan in At-Risk Areas to:

- Enhance patient comfort and extend periods of functional activity
- Provide a greater margin of safety for patients with sensory (pain) deficit
- Maximize orthopedic support and correction beyond what is possible with pressure offloading alone
- Reduce the number of early return visits by using ShearBan<sup>®</sup> prophylactically

Note: This is a qualitative representation of the research findings of Naylor & Sultzberger, et. al.

## Features and Benefits

### Ultra-low friction surface

- Neutralizes shear – the primary cause of calluses and foot ulcers – by forming a low COF interface
- Maintains low COF in moist conditions

### Thin

- Does not interfere with foot function
- Does not interfere with pressure relief modalities
- Does not interfere with footwear fit

### Supple

- Conforms to contours or depressions
- Easy to work with

### Applies to footwear, not skin

- Reduces skin irritation
- Works well with variety of wound dressings & treatment modalities
- Long-lasting durability

### Peel backing and apply

- Easy to use

### Different forms (ovals/sheets)

- Ovals offer convenience
- Sheets allow customization of patch

### Durability

- Multi-week (most often longer) protection

### Available in Single & Five-Sheet Packs and Pre-Cut Ovals

PART #	DESCRIPTION	QUANTITY
749S-BEIGE	8"x 12" ShearBan <sup>®</sup> Sheet (beige)	1 Sheet
749S-BLUE	8"x 12" ShearBan <sup>®</sup> Sheet (blue)	1 Sheet
749-BEIGE	8"x 12" ShearBan <sup>®</sup> Sheets (beige)	5 Sheets
749-BLUE	8"x 12" ShearBan <sup>®</sup> Sheets (blue)	5 Sheets
749-OV12-BL	1.75"x 2.75" ShearBan <sup>®</sup> Pre-Cut Ovals (blue)	12 Ovals
749-OV12-BE	1.75"x 2.75" ShearBan <sup>®</sup> Pre-Cut Ovals (beige)	12 Ovals
749-7	3/4" ShearBan <sup>®</sup> Rivet Cover Patches (beige)	138 pcs.
749-7-XL	15/16" ShearBan <sup>®</sup> Rivet Cover Patches (beige)	86 pcs.
